

when you get that all done then
you can hitch to the disk and
disk the north hill side on summer
fallow, and also the pea ground
and the strip below where all
those weeds were, and there are
lots of them left yet. And then you
can harrow the rest of the fallow.
I have fixed that front bar for on
the harrow.

September 7th. 1918

Instructions for Charles while I am gone. The first thing, get the Bull
and steer home and then see that the calves always have water, and feed
the hogs as much chop as they can eat, but feed it dry, and give them
plenty water, but only in the watering trough.

Next tuesday or wednesday, you take a little barley to Woods (grain and
feed warehouse) for chop, but you get other chop in return so you dont
have to wait for it (the chop). I have already spoken for it, get about
15 sacks as I already have 15 sacks. Put that little wagon box on the
low wagon, for the other old wagon is about falling to pieces, put that
short reach in the low wagon again.

Then you clean up that wheat setting on the south side, and let the stock
in there, but leave Kid and the other horses where they are. When you get
that all done then you can hitch to the disk and disk the north hill side
on summer-fallow, and also the pea ground and the strip below where all
those weeds were, and there are lots of them left yet. And then you can
harrow the rest of the summer-fallow. I have fixed that front bar for on
the harrow.

WHITE SPRING RANCH

JOHN LORANG, Proprietor

Letter of Instruction
to Charles covering
work to be done in
absence of his Father
John Lorang - Sept,
7th. 1918. Charles
became 16 two days
later on Sept. 9th.

Genesee, Idaho,

Sept 7

1918

Instructions for Charles when I am gone
The first thing get the Boob's steer horn
and then see that the calves all was got
mother, and feed the hogs as much chop
as they can eat but feed it dry, and
give them plenty water, but only
in the mothering trough.

Next Tuesday or Wednesday you take
a little load of barley to Woods for
chop, but you get other chop in
return so you dont have to wait for
it, I have already spoke for it, get
about 15 sack, as I already got 15 sack.
Put that little wagon bar on the low
wagon, for the other old wagon is
about falling to pieces, put that short
reach in the low wagon again.

Then you clean up that wheat setting
on the south side, and let the stacks
in there, but leave Kit and the other
